**HIRE LIST & GREEN
PORTABLE POWER**

JANUARY 2026

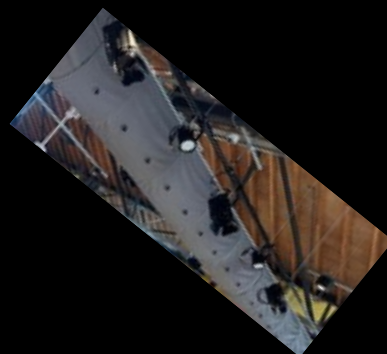

our service

With over 20 years of experience, we specialise in delivering outstanding events through expert production, lighting and sound.

production

We love turning unusual spaces into something spectacular, creating experiences that entertain, inspire, or inform your audience. With our extensive stock of lighting, sound, staging and AV equipment, we offer a full production service, including dedicated project managers to support you from start to finish.

light

We supply lighting systems and effects for a wide variety of events and applications. Our inventory includes a broad selection of generic, LED, and intelligent fixtures from leading brands like Robe, Ayrton, Chauvet, Highlite, and ETC, including the latest Ayrton ARGO 6FX lights. We primarily use Chamsys lighting desks but can provide alternative options to suit your needs.

sound

Our high-quality, reliable audio equipment includes microphones, mixers, speakers and full PA systems, ideal for both indoor and outdoor events. We source the latest professional-grade gear from leading brands such as HK Audio, D&B, DAD, Yamaha, Behringer and Sennheiser. From music tours and festivals to theatre productions and live concerts, we supply and manage complete audio systems.

portable green power

Production Light and Sound is proud to be the leading supplier of Green Voltage's sustainable-power solutions in the north of England.

We're also a member of weareSAIL, a regional network promoting environmental sustainability across the creative and cultural industries.

our stock & hire list

If you don't see what you need on the list, or you're working within a specific budget, just give us a call. We're always happy to support your project brief and tailor our services to suit your requirements.

A true alternative to traditional generators, our E!GEN power solutions are amongst the most robust, reliable, portable battery power systems available.

Battery powered systems for a new generation

Green Voltage are market leading providers of mobile power and support to the film, television, broadcast and live event industries. Created specifically to address the demand for environmentally conscious solutions, our clean, silent, generators deliver safe, reliable power to productions of all size and genre.

Completely emissions free, our range of E!GEN units have a proven track record in powering all areas of the production industry. Perfectly suited for all manner of applications, Green Voltage is the ideal energy solution for lighting, electrical and camera units - or any other department, whether working in the studio, live venue or the most extreme locations.

Quick and convenient, with rapid charge times, our range includes the world's fastest charging mobile power stations. Units are available in a choice of storage options, including 2kW, 5kW right up to the impressive 20k - 60/80/100kW systems.

For added flexibility, the intuitive plug and play design allows the system to be easily linked for extended operating times on the majority of our units. Delivering instant, robust power, even in the most demanding environments, Green Voltage E!GENs are ideal as a primary, back up or UPS source. With their rugged design, no moving parts inside from a small fan, PFC rating and wireless monitoring capabilities, we have you covered in almost any situation.

DATA SHEET INSTAGRID ONE MAX 2kW

RAPID CHARGE CYCLE
SILENT OPERATION
COMPLETELY EMISSION FREE
RELIABLE PERFORMANCE
COMPACT, PORTABLE DESIGN

VOLTstack® 2k 230V

RATED OUTPUT
2.4kW Pure Sine Wave Inverter, Clean Power (Surge rating: 3.5kW 5 sec, 5kW peak)

AC OUTPUT
Single Phase 230V @ 10 Amp

AC CHARGING
1 x 220 - 240VAC 16 Amp Inlet
Recharge time @ 16 Amps - under 2.5 hours from 0-100%
Recharge using a domestic 13 Amp socket (adapter required)
Can be charged whilst in operation

DC CHARGING
Input: SUNstack™ solar panel and cable Max Operating Input Voltage PV: 150 VDC Max Input Short Circuit Current: 30 Amp DC
CARBON OFFSET EQUIVALENT
Offsets 10kg of CO2e for 8 hours operation

OPERATING CONDITIONS
Operating temperature: -20°C up to 50°C

WEIGHT
86 kg

SAFETY
Non-Combustible Aluminium Enclosure Recommended storage temperature: 10°C - 30°C

STORAGE
2.8kWh (2.5kWh usable) Battery Type: Lithium-Ion
OUTLETS
2 x 230VAC 16 Amp Outlets
2 x 10 Amp Circuits (15 Amp Combined Max) 2 x 5 VDC USB Outlets

RELIABLE PERFORMANCE
COMPACT, PORTABLE DESIGN

ENERGY PROFILE and SAVINGS

The energy profile shown here details demand vs input
from E-Gen (Figure 1), plus the state of charge of the
EGEN (Figure 2).

In this scenario, use of the E-Gen results in the
generator being required to run for just 3.5hrs, in order
to supply the energy required (in this example, 81kWh).
As ideal generator loads are around 80%, in using a
24kW E-Gen, we can recommend downsizing the
generator size, provided that the battery can cope. In
this instance, the most efficient setup would be a
40kW generator.

DIESEL AND EMISSION SAVINGS PER DAY
Savings are primarily a result of the increase in
generator efficiency.

The results are solely from switching from a generator
to a 24kW E-Gen, with a fluctuating profile, where the total
efficiency* would be around 15%, to a generator
running on a constant 60%-80% load setting, with a
much improved total efficiency of around 30%.

FORECASTED SAVINGS PER DAY

CO₂e kg 9.9

Diesel (litres) 27

PM (kg) 3.24

NOx (kg) 31.32

CARBON OFFSET EQUIVALENT

E-Gen 20K 60kg of CO₂e for 8 hours operation
VOLTStack 15.2kg of CO₂e for 8 hours operation
VOLTStack 2 10kg of CO₂e for 8 hours operation

*Total efficiency is the efficiency of how many kWh output you have vs the
chemical energy content of a litre of diesel in kWh

GV Kube® 10k

Portable Power Unit — 6 kVA / 10 kWh silent zero-emission system

NEW!

RATED OUTPUT
Continuous: 6 kVA / 5.3 kW at 25 °C
Peak: 7,000 W (up to 10 min) / 9,000 W (up to 3 s)
Output ports: 32 A / 16 A / 13 A / USB-C / USB-A

CHARGING

Integrated high-efficiency charger with simultaneous AC +
solar input for faster turnaround.
Supports charge and discharge at the same time for
uninterrupted power supply.
Typical Recharge Time: 1.5 hours
Dual MPPT Tracker: Supports up to 8 kWp PV Array
Optional 32 A jumper configuration available on request

BATTERY & STORAGE

High-stability LiFePO₄ battery pack delivering 10.24 kWh
of usable energy at 51.2 V DC nominal.
Exceptional Service Life: Up to 5,000 cycles.
Safety First: Integrated Smart BMS protects against
under/over voltage and temperature extremes.

CARBON OFFSET EQUIVALENT

Offset: 40 kg CO₂e for 8 hours of operation

REMOTE CONTROL & MONITORING

7-inch Touchscreen: Integrated Vision touch screen
providing instant overview.
Full Telemetry: Real-time and historical data accessible
remotely via the V800 Portal.
Integrated GPS: Precise location tracking & geofencing.

OPERATING CONDITIONS

Temperature range: -20 °C to +50 °C
Recommended storage: +5 °C to +50 °C
Enclosure: Non-combustible aluminium, IP54
weatherproof rating for outdoor operation.

SCALABLE POWER & CAPACITY

Connect two units via 32 A link for up to 20 kWh / 9
kW total.
Supports simultaneous charging and discharging
ideal for extended setups or hybrid applications requiring
continuous operation.

DIMENSIONS & WEIGHT

80 x 60 x 75 cm
135 kg
